or politicians take part in the shaping of the future of their country — *The Indian Citizen*

The object of the publication seems to be to call attention to the principles authoritatively laid down that ought to guide the Educational Policy of the State in India and perhaps also to challenge the notion that that policy has always been what it ought to be especially in the attitude of the Educational Department towards private effort To those who wish to know the details of carrying out such a policy Mr Satakopachari's timely publication ought to prove highly helpful — *The Indian Social Reformer*

At the present moment too few notions of all sort prevail in the public mind concerning alike the rights of the people and the obligations of the State and Messrs Satakopachari & Co of Esplanade Row have done well in bringing out in readable form a reprint of the important papers relating to the educational policy of Government There is quite enough material in the publication before us to merit the careful study of every one who takes an intelligent interest in the education of the people of this country — *The Madras Standard*

The book contains in a handy form the principal documents in which that Policy (the Educational Policy) is set forth and a copy of it ought to be in the hands of every person interested in education in India — *Mr C A Paterson Principal Church of Scotland Mission College Madras*

It contains an able introduction for which the Publishers are mainly indebted to the Honorable the Rev Dr Miller CIE the Despatch of 1854 which form the basis of the State policy extracts from the Report of the Education Commission which is a reaffirmation of that policy the Order of the Government of India on the Report dated October 1884 and the more recent Order dated November 1899 which reviews somewhat unfavourably the action of the various Local Governments in educational matters These papers then practically cover the whole ground Whatever difficulty then has hitherto been in their (those interested in education question) way is now removed by the enterprise of a Madras publisher who has in a most convenient book form brought together all the papers which describe and set forth the State policy of education in India — *The Madras Mail*

W d ... ...

Mr Satakopachari s pul lication enables each sympathiser of Indian Education to have with him a handy record of the state s watch ord which cautions him to bestir l imself in time so that the public may take into their hands the holy cause of education Ihe volume before us contains an able introduction from the pen of the Rev Dr Miller who e long experience in matters of education is calculate l to e1 hance the dig nity of the publication which will we are ure amply repay perusal —*The South Ind an Mi l Mad ra*

The reprint and wide circulatio1 of the policy of the India Government as embodied in the papers referred to can do nothing but good at a time when renewe l interest is being taken in our educational system—thank to ou1 enlightened and wi5,o ou Vicerov The book is one too which might be pecially studied by our L T stu l nt in the Southern Pi esidencv and might appropriatelv be gi en them as a subject of their examination As might l e expec ted the i1 troduction con idering its ource contains weighty words of counsel much which carries con viction Ihe object of tl e book is to gi e the public an opportunity to become acquainted with that (the State) policv an l this the book does admirably by the publication of the D spatch of 1854 the foundation of the whole fabric of Indian Education ? certain passages of the Com mi ion s Report the Government Order of 1884 a lopting that Repo1t and the now famou and somewhat self condemi atory and injudicious Ordei of the 28th Octobei 1899 —*The Fducational R view*
